About Me

I have five years of expertise building a variety of quick and user-friendly web applications for different organizations. I am skilled in utilizing cutting-edge frameworks and technologies to improve the usability and speed of apps, and I never hesitate to try something new even if it just offers little advantages. I have coding and software architecture experience, and a recent MBA program in Amsterdam gave me invaluable insight into project data and stakeholder management. I know the best methods for continuous development with the highest quality and am an expert at creating and executing automated unit and integration tests.

Experience

Full-stack Engineer
Since Jun 2022

- Create and collaborate on below projects:
- https://teafun.co.uk/
- https://nabzgroup.com/
- Developing my skills in test automation and test driven development (TDD) mindset through numerous lines of code written for these projects.
